

## Scrap Shears **Arno®Cut**

### **Arno®Cut**

Arno®Cut Series scrap shears are the best choice for pre-compacting and cutting of metal plates and components, car body parts and similar light- to medium weight scrap.

# Arno®Cut

Arno®Cut Series scrap shears are the best choice for pre-compacting and cutting of metal plates and components, car body parts and similar light- to medium weight scrap.

Even steel rails can be cut with special notch blades.

The machines are available in five sizes from 4,000 to 12,500 kN shear force. All compacting chamber wear plates are made of Hardox® 400 - 600 and guarantee highest quality and a long service life.

## APPLICATION

- Aluminium sheet
- Steel sheet
- Light scrap

## BENEFITS

- Effective pre-crushing
- PZT technology
- Ergonomic workplace
- Hardox® wear plates

## DATA

- Cutting force: 4000-13500 kN
- Power: 110-450 kW
- Capacity: 10 sec
- Filling height: 520-1000 mm
