

Shredder **Arno®Shred**

Arno®Shred

Arno®Shred SS – the perfect choice for swarf shredding. Designed specifically for metals, Arno®Shred resists extreme conditions on scrap yards and guarantees smooth operation.

Arno®Shred

Arno®Shred SS – the perfect choice for swarf shredding. The compact single-shaft shredder with the proven rotor-stator principle.

Arno®Shred SSE with innovative tramp metal discharge. Thereby the machine can resist extreme conditions on scrap yards.

The powerful and efficient rotary shear **Arno®Shred DS** with additional fitted transverse blades crushes the material to defined piece sizes.

Due to the solid construction, the high-performance and robust cutting unit the **Arno®Shred QS** four-shaft shredder is suitable for continuous operation

APPLICATION

- Metal sheet
- Swarf
- Wire

BENEFITS

- Over 80 blade geometries out of different materials
- Quick-change system
- Wear plates
- Optimal part size

DATA

- Rotor length: 380-2100 mm
- Rotor diameter: 115-720 mm
- Rotor blades: 32-193
- Power: 11 - 140 kW
