

## Take Tech 2021

### ***ATM Recyclingsystems welcomed students of the MS Judenburg and the Polytechnischen Schule Judenburg***

As part of Take Tech 2021, an initiative of the Steirischen Wirtschaftsförderung SFG and the Styrian economic department, students had the opportunity to look behind the scenes of regional companies.

The aim of the programme is to show students possible career opportunities in the technical area. ATM Recyclingsystems trains apprentices in up to 4 different professions. The training offers a qualified education and great career opportunities. With the help of a trial education system, which comprises practical on-site training, theoretical training at school and more courses at Schulungszentrum Fohnsdorf, students get even more in-depth knowledge of their respective professions.

- MASCHINENBAUTECHNIKER (M/W)
- ZERSpanungSTECHNIKER (M/W)
- MASCHINENBAUTECHNIKER (M/W) UND ZERSpanungSTECHNIKER (M/W) – DOPPELLEHRE
- MECHATRONIKER - AUTOMATISIERUNGSTECHNIK (M/W)

At the start of their visit at ATM, students were welcomed by the CEO and given a short presentation of the company's products and business areas. Afterwards, the students had the opportunity to look over the shoulders of our experienced staff. At the end of their visit, the students were handed over a small souvenir that was made by one of our new CNC processing machines.
